Project Title: Darknet Market

I will build a website introducing Darknet Market and exploring what drives these markets through analyzing supply and demand. I want the website to have archaic website ambience but still be easy to navigate and aesthetic. The website will have 6 pages with a unifying theme and the same template and a navigation bar.

Pages will include:

- What is it? (introduction page)
- History
- Supply and Demand
- Visual Analysis
- Exploration
- Sources
